GitHub: github.com/ritiiika **Mobile:** +91-9334090380

Skills

Languages: Java, Python, C++, JavaScript
Frameworks: HTML, CSS, React, Node.js, SQL, REST APIs, Spring Boot
Tools/Platforms: MySQL, AWS, Docker
Soft Skills: Problem-Solving, Communication, Leadership, Team Collaboration

Projects

Full-Stack Social Media Platform | *React, Spring Boot, JWT, MySQL* | GitHub Feb'26-March'26

- Engineered a full-stack social networking application supporting post creation, likes, and a real-time dynamic feed with complete frontend-to-backend integration across React and Spring Boot.
- Architected **5+ secure REST APIs** using **Spring Boot and Spring Security with JWT authentication**, enforcing stateless token-based access control across all endpoints.
- Delivered a responsive, component-driven frontend using **React and Axios**.
- Structured relational data persistence using **Spring Data JPA** across 4+ entity relationships, enabling reliable CRUD operations for users, posts, and likes.
- Validated 100% of API endpoints using **Postman** before frontend integration, eliminating runtime contract mismatches across all routes.

GIPHY Integration | *Next.js, CSS* | GitHub Sept'25 – Oct'25

- Connected the GIPHY API to a Next.js frontend, enabling live search results that update instantly with each query without triggering full-page reloads.
- Reduced perceived load time by implementing skeleton loading animations and paginated result sets, keeping the interface responsive across large GIF datasets.
- Introduced a client-side favourites feature with persistent state management, allowing users to save and revisit preferred GIFs across sessions without a backend.

AI Chatbot System | *HTML, CSS, JavaScript, OpenAI API* | GitHub Feb'25-March'25

- Wired the OpenAI API into a browser-based chat interface supporting multi-turn GPT-powered conversations with real-time response rendering for Q&A and explanations.
- Handled asynchronous API calls and streaming responses using vanilla JavaScript, preserving full chat history and scroll state accurately across multiple conversation exchanges.
- Constructed the entire frontend without any framework — using pure HTML, CSS, and JavaScript — demonstrating foundational DOM manipulation and event-driven programming skills.

Training

Summer Training | *LPU* | Certificate

Completed intensive training in core data structures, algorithms, and problem-solving techniques.
Strengthened algorithmic thinking for technical interviews and real-world software development challenges.
Practiced competitive programming and optimized code performance under expert mentorship.

Certificates

Privacy and Security in Online Social Media | NPTEL | link Nov 2025
Oracle Cloud Infrastructure 2025 Certified Architect Associate | Oracle | link Sept 2025
Master Generative AI & Generative AI Tools | Udemy | link Aug 2025
AWS Cloud Fundamentals (AWS Academy + AWS Educate) | AWS | link Jul 2025

Achievements & Co-Curricular Activities

Participated in Bharatiya Antariksha Hackathon 2025 organised by ISRO link Sept 2025
Participated in Adobe Hackathon 2025 link Jul 2025
Achieved 5★ rating in Java on HackerRank
Solved 100+ algorithmic problems on LeetCode

Education

Lovely Professional University Aug 2023 – Present
B.Tech – Computer Science and Engineering | CGPA: 6.71 *Phagwara, Punjab*

Narayana Junior College Apr 2020 – Mar 2022
Intermediate | Percentage: 93.8% *Hyderabad, Telangana*

DAV Public School Apr 2019 – Mar 2020
Matriculation | Percentage: 89.6% *Dhanbad, Jharkhand*
